Lower Mankty, March 18.—Cheese—American withomisiteration. Foreign scarce and dear. Froces are
with difficulty kept up.
Cotton—The uncertainty respecting the Oregon ques
tion and the want of fresh intelligence from America,
has caused both merchants and speculators to be extremely cautious in their operations. There is, however, a fair business being done, without change in price.
Hidas—A fair business is being done in this market,
and prices for most descriptions are well supported; in
some inatances slightly savanced.
Hope—The market has been more liberally supplied,
and the trade operating with caution, factors have been
compelled to take rather lower rates to mak railes.
Metals.—There has been little desire evinced to pur
class are taken, stocks having accumulated; we quote
rig in the Clyde at 72s 6d; in Wales and Staffordshire
los to 110; common, Welsh bars £8 15s to £9 per ton.
The business transacted in Spelter has been to a small
extent only, and £15 sato £19 10s per ton are the rates
accepted en the spet. Tin is little wanted, and at public
sale 2000 slabs of Banca tin were taken in at 88s, and
1000 slabs of Straits at 86s per cwt., being rather under
former terms.
Naval Stores.—No change has taken place in the value

sale 2000 slabs of Banca tin were taken in at SSs, and 1000 slabs of Straits at SSs per cwt., being rather under former terms.

Naval Stores.—No change has taken place in the value of ter. The few small retail sales making are fetching 15: 63 for Stockholm, and 13s for Archangel. English coal is firm at 17: 64 per cwt. The inquiry for rough turpentine is limited, but holders refuse lower rates. Spirits are dult of sele, and are is to 2s cheaper.—Puncheons are nominally quotted at 51s.

Oils.—An extensive and improved trade is now being carried on in Linesed Oil. Prices have had a censiderable advance, sales having been made at 25s to 25s 3d per cwt. A fair business has been transacted in Rope Oil; we quote pale at 28s to 35s 6d, and brown at 35s to 35s 6d. The prices of Olive do not improve, but it has secured a good sele. Cocca Nut is wanted; holders display firmness, and supply the market sparingly. As regards Cod Oil, holders and exporters eperate with caution. For seat the market has a dull appearance, and as the stock is now a large one, holders are anxious to realise. Speim has been purchased sparingly, although good and fine British can be obtained at £75 to £78 per tun; a fair quantity is pressing for sale. In American Lard Oil there has been little passing. The difference in the prices of all kinds of Fish Oils is very considerable in comparison with late years. On the 18th int, at rublic ancetion, 25 tune of Sperm Oil and Headmatter from New York were sold, the former at £80 to £90 os, and the latter at £91 tons of Seal taken in; mixed pale at £27 los, tinged £26 to £26 los; 10 tune of Southern Whele at £25 6s for good.

£26 to £26 15s; lotuns of Southsrn Whale at £25 6s for good.
Provisions—Fine and good Irish butter is still wanted, and he suprly being small, prices rule firm; but the low and middling sorts, which are plentful, are purchased with caution, although there are sellers upon the reduced terms. The better descriptions of Dutch have heap in brisk request, at advancing prices. Although there are sellers of Bacon upon further reduced terms, still the town and country demand is limited. Frices continue to give way for Lard, and the demand has been limited; hladdered at 58s to 52s, fixlus and kegs 50s to 57s, and American 46s to 50s. Hams are little wanted, and there are sellers upon lower terms, 50s to 55s per cut being taken for Irish. For barrelled Irish beef and pork, the market has a very dull appearance, and it is difficult to quote prices with accuracy; American, however, has been in good demand. India Beef, in bond, at 100s to 105s per tierce; India meas 90s to 53s. prime meas 85s to 80s, prime new meas pork 60s to 63s 64, and old at 56s to 58s per barrel.

Rica—The demand for Bengal rice has fallen off, and prices, therefore, seem to decline. Cleaned rice is less wanted; 17s to 21s are the rates paid for Patna, and 24s to 30s for Carolins.

Tallow—A good business has been transacted in Rus-

prices, instructs, see the rates paid for Patna, and 24s to 30s for Carolina.

Tailow—A good business has been transacted in Russian utilow, and prices have ruled firm; fine P. Y. C., duty psid, has been selling currently at 42s 9d to 43s per cwt. The stock is still on the decrease, indeed, the quantity remaining in first hands, of the best quality, is small. In American and New South Wales purchases to a fair extent have been made upon former time, and there is less quantity pressing for sale.—Town made Tailow has been in excellent request at 42s 61 to 43s per cwt net cash. The stock in bend is 6,498 casks it cas than it was last season, but prices are still higher. There is a good consumption going on, exceeding that of last year. On the 13th instant, the percels of New South Wales offered at public sale, amounting to 478 casks, were sold at stiffer rates; fine went at 42s 64 to 43s, good 41s 64 to 42s 3d, middling 40s to 41s 3d, low soit greasy 38s 6d to 39s 9d, but 65 casks of North American were withdrawn.

soit greasy 364 ed to 395 9d, but 66 casks of North American were withdrawn.

Tea - Holders continue to manifest firmness, but little business has been transacted, especially in Congou, since our last publication. The stock exceeds that of last year. Tea ef all descriptions is still much cheaper than it was at the same time in 1845.

Whalebone — A brisker demand has been experienced, and en advance has taken place. 3 tons of acuthern at auction fetched £240 to £241 per ton. Privately several parcels have been disposed cf. and the supply is still small.

auction istched £240 to £241 per ton. Privately several purcell have been disposed cf. and the supply is still small.

Wool.—The arrival to this port during the week ending March 17, were only 901 beles; the chief part from Russia. In foreign and colocial no change has taken place in prices, but the operations have been upon a small scale only. For English former rates are asked, but there has been little passing.

Livzaroet. Manuers, March 16.—Ashes.—Montreal Pot and Pearl Ashes continue in a very limited demand, and previous prices are barely supported, say 22s 6d for both descriptions. Iron—The iron market is flat, and there is not much business doing; the disposition appears to be to work up old contracts rather than enter into fresh ones. In present transactions the buyers have the advantage. Scotch Figs are quoted in Glasgow at £315 per 'on: price desivered in Liverpool is £4 5s. Common Bars £9; Neil Rous £9 10s; Hoop: £11; Sheets £12; per 'on: price desivered in Liverpool. Neval Stores—A public Sale of 1000 bb is turpentine on the 11th instant was well attended, but the trade being indisposed to bid, the whole was withdrawn, and prices must therefore be considered still as nominal. Some parcels of American rosin have been taken by the trade, at 15s 9d from the quay. Provisions—The depressed state of trade in general, with the great tightness of the money market, has caused all produce to be lower since the 4th instant, and the samount of business done is to a vary limited extent in consequence. Rice.—The sales of rice since our last publication are 5000 begs Bengal, at rather lower rates; ordinary white at 12s 6d, middling at 13s, and good to fine at 13s 9d to 14s 3d per cwt. Balt.—There has been a musual slackness in the demand for Salt since the last advance took place, particularly in commen, in which description very little is doing; the present rates are, however likely to be maintained. The expectation of a reduction has no depublikept back orders for a time, which must eventually come forward; we 16. 61; do shute 17s 66; Merine and Butter 15s 66; Common 13s; River Freights 3s; Deck and Town Dues 9d. Tallow—There has been a fair inquiry for tallow this week, but the rates at which sales have been made, have in leav instances transpired; they are supposed to be rather lower. We quote P Y. C. 41s 9, to 4:s. Tea—The market has again been very heavy, and the transactions limited; to effect sales lower prices would have to be submitted to. Tobacco—There is no change to report in the market for Tobacco since our last report. For the rates now paid, we refer to our "Prices Current" Wool—The woel market has been more brisk during the last ten days, but until the settlement of the Government measures now before Farliament, we cannot look to any permanent improvement. United States wool has been less inquired for, and is offering at rather lower rates.

The Corn Trace.

[From the Liverpool Times, March 19]

Liverpool.—Since our last publication there has been a better business done in wheat of all descriptions, and priless have slowly, but gradually advanced, especially at the markets held on the 6th and 9th inst; on the 13th inst however, there was a dull sale for wheat of all descriptions, with a slight tendency to recede in value. It is and Canadian Fleur, notwithstanding, was in some request, and upon a good demand in the manufacturing towns of this district in course of the week, our last quotations were fully maintained. Frime States Flour in bond continues to find buyers at 37a; but in Wheat, under lock, the sale of one parcel only of Balticred is reported at 7z per 70 lb. There was a numerous extendance of home and country buyers at the market held on the 17th inst; the Wheat trade appeared to open with increased firmness, but in consequence of the snouccement of the Fremier's intention to admit (under guarantee) bended Gram and Flour, as soon as the Corn Bill shall have passed the third reading, the demand afterwards subsided materially, and the business of the morning closed heavily; the best Wheats alone supporting the rates of the 10th inst, and other descriptions rather receding in value. Irish and Canadian Flour in like manner met a limited sale on the terms of that day week. Frime brands of States Flour still meet inquiry at 77 per brd, in bond, but holders being disinclined to accept that price at present, few sales are reported; and in Wheat, under lock, little or no business was apparent.

London Coan Trade, March 18.—Since the free trade
policy of Sir Robert Peel has been sanctioned by a majority of ninety-seven in the House of Commons, the
trade in gram has been rather more buoyant than for
some weeks previous. During the week ending March
9, selected qualities of wheat moved off standily at
pretty well supported prices, while in the secondary qualittles rather more business was doing. The past week,
that anding on the 14th instant, the demand was principally for ine best white qualities, which were taken of
on tull as good terms as on Monday se'nnight, whilet
the quantity left in hand is quite unimportant. In loreign wheat the transactions continue limited, but holders are not disposed to press sales at any reduction. On
Monday, March 16, the show from the home counties
was not large; selected samples brought is per quarter
advance; but a clearance was not effected of secondary
descriptions, although reely offered at former prices.
Free foreign is unaltered in value. Holders of bonded
demand quite as high rates; but scarcely any transactions are reported. The four trade was dull, and prices
without any change.

Continental Markers—Late accounts from Odesra

demand quire as high raise; but scarcery my transmotions are reported. The flour trade was duil, and prices without any change.

Continental Markers—Late accounts from Odessa riate that the demand continues at late prices, and that the better qualities are getting scarce. No alteration is recorted as having taken place at the Danzig market. At Rostock the market for wheat continues depressed, and prices have been further reduced. The remark is applicable to Hamburgh.

Paus Boussa, Monday, March 16.—The accounts received from America by the last arrival have had a considerable effect on the market here, and both Tarees and Fives have risen, the former closing at 84f. 40c., and the latter at 190f. 45c.

Rathwars.—The share market has also improved, and most of the leading lines are quoted at a good advance. For cash, Faris and Orleans left off at 135 ; Paris and Rouan 1673f. 50c; Rouen and Havre, not quoted; Avigpen, 200f.; Straeburg and Bale, 200f., Forthean, 700f. 70c.

Havaz, March 14.—Cotton—Owing to the accounts, Sthult, from New York, market, early lest week, animated, a spirited demand from the trade, and prices advanced id. Subsequently, however, prices declined to the point from which they had previously started. This dull feeling has been further increased, since the arrival 5th inst., of advices of the 16th ult, which amounce a depreciation in the U.S., and that large shipments for the European ports might therefore be expected; this has shaken confidence, and restricted the buying to immediate necessities. The week closes very flat, and prices tend downward. Sales 3326 N. O. 55 a 76; 842 Mobile 32 a 71; 1867 Upland of a 73; 696 Mobile, to arrive, 71.—Imports same period 13,874. Coffee—The large public sales shortly to be held in Holland absorb the attention of buyers. Market, therefore, very dull, sales only 602 a 52 bom. 400; 176 Perio Cabello 33c, 227 Brazil 46jc, in bond; and 1454 St. Domingo, damaged, at auxition, at 83c a 95c per ½ kil. d. p. Hides—A fair inquiry, and prices very firm. Sales 2352 B. Ayes, 67y, at 87½ a 23½, 2000 Pernambuco dry raited, at 36c; 1177 Laguayra dry 50c a 59 Sugar—Some inquiry in W.T., and prices firm.

Bales of 650 tons St. Dom. Logwood 16 50 a 6 60. We quote Camp Logwood, Spanish cut, 110 a 11; but prices, on account of the proximity of the sales: 300 bags Brazil only sold at former prices (20) a 21½) Raw Sugar neglected. Purchases in indigo trifling. Result of the public sales in Hides and Skins unsatisfactory, only one-third offered meeting with buyera; E. I. scarce and wanted. Holders of Cotton very firm. Rice heavy—Spices quiet, and prices as before.

Anywars.—Demand for coffee rather more lively, though prices are not better; the small quantity declared by the Dutch Co. and the want of arrivals, have given generally submitted to further decline, sales have again been extensive, but entirely for export; consumers still holding fact. Cotton very firm. For export, 250 bbls Carolina Rice taken; lower qualities most saleable. A fair

HAMBURG.—Prices of Coffee unaltered; sales only 2600 bags Rio. Sugar—Sales 800 boxes Havana; prices have not varied. Cotton dull; only 160 bales Am. bought.—Spelter rather better.

More News from Europe.

The long expected news from Europe, by the Umcorn, has been received at last, and has now been before the public nearly twenty-four hours— a sufficient time to enable an opinion to be formed of its tenor, as regards our relations with England. The copious extracts which we give in this day's paper, from the press, and the proceed-ings of the British Parliament, will, we think, justify us in saying that the news is pacific, in a great degree, and tends to preserve the peace between the two countries. Although the tone of the press is rather irritable, we look upon it as insignificant, compared with the developments that took place in Parliament a short time before the steamer sailed. It appears that on the 17th of March last, the Earl in It appears that on the 17th of March last, the Earl of Clarendon moved for the production of such portions of the diplomatic correspondence that had passed between the American Secretary of State and the British minister, as would not be inconsistent with the public interests to produce. In answer to this motion, the Earl of Aberdeen made a somewhat lengthy reply, to the effect that he did not consider it compatible with the public interest to produce the correspondence in question; and further that he could not bring himself to believe that any reasonable doubt remained of the British Government being able to bring the Oregon question to a satisfactory conclusion. Under the circumstances, this expression of the Earl of Aberdeen, coupled with the refusal to produce the correspondence in question, must impress upon every mind that the Earl of Aberdeen was sincere in his belief, and that the British Government did not anticipate a resort to extremities ernment did not anticipate a resort to extremities for the settlement of the question. This opinion is further strengthened by the report of a large meeting of traders, manufacturers, and others, which was held on the same day in London, and at which a resolution was adopted declaring that the Oregon question admitted of a satisfactory adjustment by negotiation, and suggesting the appointment of Sir Henry Pottinger, on account of his success as a diplomatist n India and China, as the best person to be entrusted with the office of negotiator with the American go-vernment for that purpose. When we consider that abundance of time had elapsed since the receipt of the refusal of the American Secretary of State to

ters of war inflicted upon the two countries, than to forbear indulging in that wholesale mode of abuse that has marked its course since the revolutionary war. This, however, is of little moment, as long as the public mind in that country, and the

government, are disposed to peace. tone of the public mind as developed at the public meeting in London, and the avowal of the Earl of Aberdeen, in reply to the remarks of the Earl of Clarendon, of the highest importance at this par-ticular juncture. The passage of Mr. Crittenden's compromise resolutions in the Senate by a vote of 40 to 14, is conclusive that a majority of that body is averse to the war policy of the ultra fifty-four forty men, and in favor of settling the Oregon question by compromise. Although the giving of the notice is authorized by those resolutions, they nevertheless impliedly compel the President to resort to compromise before giving the notice. Indeed, we look upon these resolutions, and the large vote by which they were carried, more in the light of a solema recommendation to both governments to re-open negotiations of this gexed question, and settle all the difficulties between the two countries, in relation to it, amicably and peaceably—we look upon the passage of these resolutions more in this light, than we do as a measure to abrogate the convention of the 20th of October, 1818. Although the giving the notice is left to the discretion of the President, we think the responsibility of taking that step directly is purposely avoided, for fear it would be construed inte war measure; and, in lieu there of, a peaceable recommendation to settle the question amicably, by

compromise, is substituted.

Taking all these circumstances into consideration, the tone of the foreign news, and the passage of Senator Crittenden's resolutions in the Senate, which has created more injury to commerce, and excited more hostile feeling, than the whole of the territory in dispute is worth to either country, is in a fair way of being disposed of satisfactorily to both parties; and that, too, before the expiration of six months, unless some contingencies occur to mar the prospect. One of those contingencies is this: the House of Representatives may not concur in the resolutions passed by the Senate, and the war party may still persist in asserting the American

claim to the whole of the Oregon terrritory.

In the event of such being the case, the matter will be again thrown into the hands of Mr. Polk. If then, Mr. Polk should-despite of the passage of the resolutions in the Senate, and the pacific tone of the Parliament and people of Great Britain—remain obstinate, and throw away the opportunity which is again afforded, of resorting to compromise, a war will follow. Although England is desirous of peace, and in entering into a war with the United States would peril her existence, still the question has assumed such a shape, that in the eyes of all Europe and the whole civilized world, she would be compelled even at such a hazard, to engage in war with us, if the ultra claims of the administration should be insisted upon. It would appear, then, that there is an awful responsibility resting on the chief magistrate of the United States. It may be said that James K. Polk holds the peace of the world in the hollow of his hand. God grant he may be found equal to the

Files of the Jamal do Commercio and O Mercantil, from Rio Janeiro, to the 28th of February, are among our papers. They contain nothing of interest. The O Marcantal gives the following singular

The O Mercantal gives the following singular piece of absurdity extracted from the Commercio Del Plata, of the 9th of February:—

"Not long since there arrived at Rio de Janeiro, a 'scientific commission' from the United States, among whom was a certain French cavalier, who gave out that they came for the purpose of exploring the region of country watered by the rivers Parana and Paraguay. From Rio de Janeiro this commission of swans proceeded on to the Rio Grande, and travelled through that territory, in a modest manner, in the quality and character with which they had invested themselves. From thence they proceeded to Uruguay; and when they arrived in the country and province of Corrientes, the travellers threw off the scientific mask which they had assumed, and made it known that they were neither more nor less than a legation, deepatched by the government of the United States to Paraguay, charged by said government with the commission of acknowledging the independence of the latter republie." The Frenchman, who accompanied them, was represented to be the Secretary of Legation. The journal adds that its informant had forgotten his name, and inquires, "What will President Rosas say to this contraband diplomacy of the United States "I It is contraband diplomacy of the United States "I It is contraband diplomacy of the United States "I It is difficult in this case to say which is most contemptible, the humbug and hoax of these travelling and vagrant plenipotentiaries, or the credulty which could swallow their idle stories and pretensions.

Gen. Paz, who commands the forces of Corrientes, Uruguay, Paraguay and Entre Rios, is accompanied in his camp by the English Admiral Hothom and Capt. Trennart. He is at the head of 16 000 well disciplined troops. Among these, the soldiers of Paraguay, who amount to 10,000, are highly spoken of. It is said that out of the whole number of the men in the Paraguayian army, only three or four can be found who cannot read or write.

These items of news, thou

overnment for that purpose. When we consider that abundance of time had elapsed since the receipt of the refusal of the American Secretary of State to submit the Orgon question to arbitration, for the British public and Parliament to have formed an opinion on that measure, and to adopt a line of conduct and a system of measures corresponding with that opinion, the declaration of the Earl of Aberdeen in the House of Lords, and the expression of opinion by the public meeting in London, deserve to be viewed as highly important, and as indicative of the intention of the British people and parliament, not to break the peace happily existing between the two countries if collision can, under any circumstances, be avoided.

This, we think, is the view taken of the British stocks of every kind advanced considerably.

Notwithstanding the pacific indications of the Earl of Aberdeen and the public, and the manifest desire there is to preserve the friendly relations between Eagland and the United States, the contrary is exactly the case. In the United States, the contrary is exactly the case. In the United States, the press, with but few exceptions, is decidedly hostile. This state of things is a little strange, when we consider that, in the United States, the press, with but few exceptions, is decidedly in favor of setting our difficulties with America amicably, the Eaglish press continues to wage that war of words which it has carried on for so long a period against America and every thing American, and its tone is decidedly hostile. This state of things is a little strange, when we consider that, in the United States, the countrary is exactly the case. In the United States, the countrary is exactly the case. In the United States, the press, with but few exceptions, is decidedly in favor of setting our difficulties with America amicably, the Eaglish press has been loud in recommending a resort to peremptory measures, to bring about the same result. We can't consumer that the press in that country would prefer to have all

Acquittal of Polly Bodine.

We are indebted to Mr. Barnet, of Newburgh, (who arrived by the Albany boat this morning,) for a copy of the Newburgh Courier of yesterday, containing the result of the trial of Polly Bodine on the charge of murder. The jury rendered a verdict of NOT GUILTY.

Pank Thearns—Mr. Hackett again appeared at the Park theatre, last evening. The first piece was the "Irich Attorney," in which, Mr. Hackett appeared as Pierce O'Hars, and kept the audience me roar of laughter by his rich personation of Irish character. The Kentuckian was afterwards played, in which Mr. Hackett appeared in his original character of Col. Nimrod Wildfire. This character Mr. Hackett has made his own, and last evening fully sustained the reputation which he has gained. The evening closed with the farce of the Baugal Tiger. On Monday evening, will be presented King Henry the Fourth, in which Mr. Hackett and Mr. Vandenhoff will appear.

Bowkar Thearak.—If we may judge from the repeated bursts of applause which nightly greet the representation of the drama of "Lafitte," we may well believe that the frequenters of this popular place of amuse-

resentation of the drama of "Lastte," we may well believe that the frequenters of this popular place of amusement are highly delighted with its performance. The action of the drama is well calculated to exhibit, in a strong light, the peculiar telests of Mr. J. R. Scott, and the other principal performers. The management must show their discernment in the selection and presentation of pieces of starling merit, and suited to the taste of the audience. On Monday evening, the tragedy of "Adelgitha" will be presented, with the drama of "The Old Tell-House."

GRESSWICH THEATRE.—This elegant resort in the play-goers of the upper part of the city comes up fully to all that its enterprising managers promised. The performances are always correct, and frequently brilliant, the scenery is neat and tastefully painted, the orchestra is composed of competent musicians, and in short the foule ensymble is excellent. There is no place of amusement in the city where a stranger or a citizen can spend an evening more agreeably. A great bill is to be presented on Monday night; among other things the celebrated "Yankee Hill" is to appear in two of his best pieces.

Judging by the number of persons that were in the house, we should say that it was a very substantial one Graman Society Concrar.—The Tabernacle was crowded last night with a fashionable auditory, assembled to hear the annual concert of the German Society of New York. The most striking part of the performances were the variations on "The Prayer," from the Opers of "Moses in Egypt," and the "Values Burles cas," composed and performed by Senhor Noronhe a Spanish or Portuguese gentleman of great musical talent, who has lately arrived in this country from Brazil. He was enthusiastically appleted at frequent intervals. Bellini's duetts of "Deh Conte" was admirably sung by Miss Northall and Miss Korsinsky. These ladies are sweet vocalists and very generally admired.

Mr. BROUGHAM.—This talented and patriotic representative of the Milesten race, had a capital house, last evening, at Falmo's. No man living, probably, since the days of the lamented Power, of whom Mr. Brougham is acknowledged to be a worthy successor, has the power of peurtraying so faithfully the contradictions and contraricties which constitute the Irish character—at least none has appeared in public. His conceptions are bril lisht and poetical—his delivery is expressive, and his style highly graceful. We understand that Mr. Brougham will give another entertainment to morrow evening in Brooklyn. At the conclusion of last evening's entertainment, he was called out by the sudience, and made a brief and pithy acknowledgment of the obligations he was under to the public for the indulgence granted to him in this city.

**LATER PROM MEXICO.—By the arrival at this port of the bark Elizabeth J., from Havana, we are placed in possession of papers to the 10th inst. In those of the 9th inst., we flad the following additional items of news from Mexico, as brought up from Vera Cruz by the English steamer.

All reference to Mr. Blidell's proposed departure is, of course, of no moment, as his arrival at New Orleans has already been announced. There were no changes of interest at the Capital, save those which we annex.

On the twenty-fifth of February, there were lying at anchor in the harbor of Mazatlan, two American frigates, two sloops of war, a schooner, and a transport, in all mounting 161 guns. At the same time there were a British frigate of 50 cuns, and a brig of 16; Frigate Savannah, Capt. Hoal; Frigate Constitution, Capt. Percival; Sloop-of-war Portsmouth, Capt. Montgomery; Sloop-of-war ——, Capt. Page; Schooner Shark, Capt. —; Transport Erie, Capt. Tunis; English frigate American, Capt, John Gordon; English brig Frolic, Capt. Hamilton.

The English steamer at Havana, on the 8th of April, from Vera Cruz, brought as passengers General D. Juan Nepomuceno Almonte, on a diplomatic mission to both the governments of England and France. He was ac companied by his Secretary, Leroi de Tejada.

Examination of the Express Robbers.—James W. Smith, of New York, son of A. M. C. Smith, and officer M'Gowan, of Philadelphia, arrived in town yesterday morning, having in charge Benjamin Fratt, slices Brown, charged with participating in the robbery of Livingston & Wells' Express, in October last, all of whom were arrested in Philadelphia Upon the examination at the police office yesterday, it appeared by the testimony of Mr. Smith, that some time about the mid dle of March last, he called on Fratt, in company with one of the Express firm, and that he then gave up to Mr. Wells, a portion of the funds scolen, amounting to about \$5,600, which Fratt stated he had received from Dr. Hatch. This was probably one of the sheres. This was all the testimony introduced, and upon which the defendants were committed to await the arrival of further evidence from the east. The whole plan of the robbery,

made public.—Rochester Advertiser. April 17.

SEDUCTION.—We are informed by a citizen of Swanton, that the people of that town were thrown into a state of no little excitement, last week, by the revelation of a most flagrant case of seduction, which has finally termined in the death of the unfortunate victim. A young girl, (we suppress names) living with her brother-in-law, was recently discovered to be enciente; and to account for this, she said that some unknown person entered her bed room at midnight when the family were absent, and no one near to hear her cries for halp. This story was believed. The child was born and during her recovery a fewer ensued which laid her on the bed of death, where she confessed that her own brother-in law was the father of her child, and that this crimmal intercourse had been going on for two or three years.—St. Albans Repub.

Legislative Summary.—In the Senate, the Hudson River Railroad bill was taken up in committee, and the details of the bill occupied the entire morning session. Several amendments were made to the bill—smean them one restricting the maximum grade to 20 feet to the mile. In the House, a report was submitted from the majority of the committee on Ways and Means, concluding with a resolution against any present assumption of the public works. Of this report 1000 copies were ordered to be printed. A resolution of inquiry into the amount of the feesef the justices of the Marine Court was adopted. The Landlow and Tenant bills were then taken up, and Messer, Watson, Weils, Tiden, Beiley, Shefer and Ludlow addressed the committee.—Albany Argus, April 17.

On the 17th inst a pert of the large new mill now being erected on the Hamilton corporation at Lewell fell down with a tremendous cresh. It was occasioned by the water working in under the mill. About forty feet of the building fell carrying away part of the roof. No lives lost.

The advices from Europe are, both in a political and commercial point of view, considered rather favorable than otherwise.
